

## Route du Nord - Viaducts «Glaasbuurgronn» et «Grousheck»

These two viaducts cross Luxembourg's "Green Forest" valleys "Glaasbuurgronn" and "Grousheck". The location, deep forest and valley's heights, made the construction process of these two road bridges very challenging.

## « Route du Nord » Viaducts "Glaasbuurgronn" & "Grousheck"

These two viaducts cross Luxembourg's "Green Forest" valleys "Glaasbuurgronn" and "Grousheck". The location, deep forest and valley's heights, made the construction process of these two road bridges very challenging. This section was a key element of the new road because it connected the Kirchberg Plateau with the road to Echternach and allowed so to avoid the corkscrew of Dommeldange when driving from Luxembourg to the North.

Total construction period: from June 1998 until September 2001
